

API Bug Report – E-commerce Application

Project: E-commerce API Testing

Tester: Hema

Tools Used: Postman, Chrome DevTools

Date: August 2026

BUG 01 – Login API returns 500 instead of 401

Bug ID: API-BUG-01

Module: Authentication

Endpoint: POST /api/login

Severity: High

Priority: High

Description:

When invalid credentials are sent, the API returns **500 Internal Server Error** instead of **401 Unauthorized**.

Steps to Reproduce:

1. Open Postman
2. Send POST request to /api/login
3. Body:

Code

```
{ "email": "wrong@test.com", "password": "wrongpass" }
```

4. Click Send

Expected Result:

API should return: 401 Unauthorized with message: *Invalid username or password*

Actual Result:

API returns: 500 Internal Server Error

BUG 02 – Product API returns empty list even when products exist

Bug ID: API-BUG-02

Module: Product Listing

Endpoint: GET /api/products

Severity: Medium

Priority: Medium

Description:

The API returns an empty array even though products exist in the database.

Steps to Reproduce:

1. Open Postman
2. Send GET request to /api/products
3. Check response

Expected Result:

List of products should be returned.

Actual Result:

[] (empty list)

BUG 03 – Add to Cart API accepts invalid product ID

Bug ID: API-BUG-03

Module: Cart

Endpoint: POST /api/cart

Severity: High

Priority: High

Description:

API allows adding a product with an invalid product ID (e.g., 9999).

Steps to Reproduce:

1. Open Postman
2. Send POST request to /api/cart
3. Body:

Code

```
{ "product_id": 9999, "quantity": 1 }
```

Expected Result:

404 Product Not Found

Actual Result:

201 Created Cart item is added incorrectly.

BUG 04 – Checkout API does not validate payment method

Bug ID: API-BUG-04

Module: Checkout

Endpoint: POST /api/checkout

Severity: Medium

Priority: Medium

Description:

Checkout API accepts invalid payment method values.

Steps to Reproduce:

1. Open Postman
2. Send POST request to /api/checkout
3. Body:

Code

```
{ "payment_method": "abcd", "address": "London" }
```

Expected Result:

400 Bad Request Message: *Invalid payment method*

Actual Result:

200 OK Order is created.

BUG 05 – Order History API shows other users' orders

Bug ID: API-BUG-05

Module: Order History

Endpoint: GET /api/orders

Severity: Critical

Priority: Critical

Description:

Order history API returns orders belonging to other users — **major security issue**.

Steps to Reproduce:

1. Login as User A
2. Send GET request to /api/orders
3. Observe returned order list

Expected Result:

Only User A's orders should be shown.

Actual Result:

Orders of other users appear.
